36. That the rates in 2.23 *supra* BE SUBJECT to CPI escalation as set out hereunder:

ESCALATION

For this contract the rise and fall (for Fuel) and escalation (for Labour and Plant) will apply to all plant items irrespective of whether the item uses fuel or not or whether an operator/operators accompany the plant item. The changes in the tendered rates shall also apply to the bid transport rates.

For the purposes of the changes to the rates, it is assumed that the rates are composed as follows:

Fuel:	30%
Labour:	15%
Plant:	55%

Changes in rates due to the variation of Fuel costs will be applied on a monthly basis based on the Wholesale cost of Diesel (0.05% Sulphur) in Gauteng.

Changes in rates due to the variation of Labour and Plant/Machinery costs will be applied on an annual basis based on the CPI and Plant indexes as issued by Statistics SA.

The bid rates shall be increased or decreased on a monthly basis by a factor determined by the formula below, rounded off to the fourth decimal place:

$$Factor = 0,15 * \left(\frac{Lt}{Lo} \right) + 0,55 * \left(\frac{Pt}{Po} \right) + 0,3 * \left(\frac{Ft}{Fo} \right) - 1$$

Where:

"L" is the "Labour Index" and shall be the "Consumer Price Index" for the Primary Urban areas as reflected in Table A of the Statistical Release P0141 as published by Statistics South Africa

"P" is the "Plant Index" and shall be the "Plant and Equipment" as reflected in Table 4 of the Statistical Release P0151.1 as published by Statistics South Africa

"F" is the "Fuel Index" and shall be the Wholesale price of 0,05% Sulphur Diesel (Inland) as published by the Department of Minerals and Energy.

The suffix "o" denotes the base indices applicable to the base month which shall be the month prior to the closing date of the bids for Labour and Plant and the month in which the bids closed for Fuel.

The suffix "t" for Labour and Plant denotes the current indices applicable to the month two months prior to that month in which the last day of the period falls to which the relevant monthly statements relate but for Fuel the current month index/price will apply.

For Labour and Plant, the indexes will be adjusted on an **annual** basis in the month following the month in which the bids closed while for Fuel, the rates will be adjusted on a **monthly** basis.

If therefore the bid closing date is in **June 2019**, the rates will increase for Labour and Plant cost changes on 1 July of each year utilizing the May indices of the particular year.

Examples of calculations:

Assuming that the bid closing date is in March 2019, the factor to amend the rates effective 1 April 2020 will be calculated as follows:

$$Factor = 0,15 * \left(\frac{CPI(February2020)}{CPI(February2019)} \right) + 0,55 * \left(\frac{Plant(February2020)}{Plant(February2019)} \right) + 0,3 * \left(\frac{Diesel(April2020)}{Diesel(March2019)} \right) - 1$$

Assuming that the bid closing date is in April 2019, the factor to amend the rates effective 1 May 2020 will be calculated as follows:

$$Factor = 0,15 * \left(\frac{CPI(March2020)}{CPI(March2019)} \right) + 0,55 * \left(\frac{Plant(March2020)}{Plant(March2019)} \right) + 0,3 * \left(\frac{Diesel(May2020)}{Diesel(April2019)} \right) - 1$$
